VISION

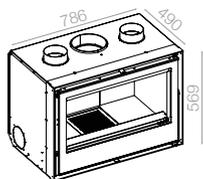

The Vision Series was designed for those that appreciate elegance. With modern design and a wide fire view, these stoves are suited for a variety of environments.

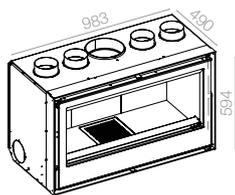

VISION 7

VISION 8

VISION 10

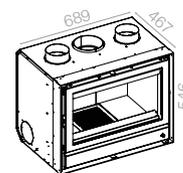

SQUARE

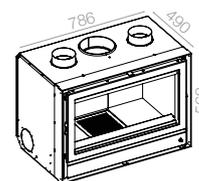

This classic and sophisticated series will blend comfortably with any interior. It is available in two sizes that can be easily adapted, to an existing fireplace or a new construction.

SQUARE 7

SQUARE 8

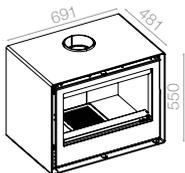

CUBEBOX (CB)

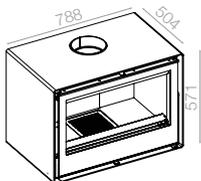

This versatile option combines the benefits of an efficient and powerful fireplace insert with the ease of installation that accompany a free standing stove. Its robust assembly and sophisticated design with multiple configuration options won't leave you indifferent.

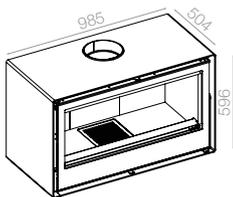

CUBEBOX 7

CUBEBOX 8

CUBEBOX 10

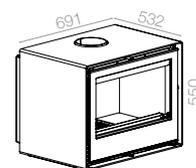

CUBEBOX + STAND

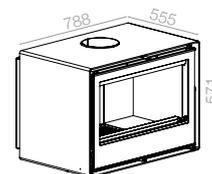

Ever imagined a freestanding stove upended on your living room wall? This modern and attractive stove is surely the one heating source that will complement the decoration.

CB 7 + STAND 7

CB 8 + STAND 8

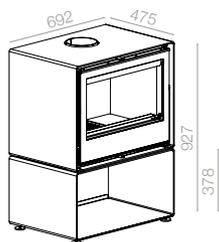

CUBEBOX + RACK

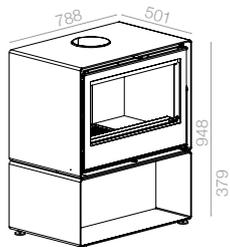

This freestanding stove with an integrated log store is practical and functional, a great solution for those who want to occupy the least space.

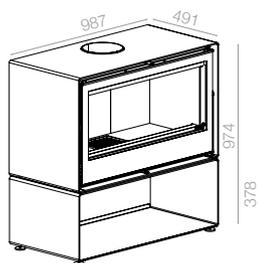

CB 7 + RACK 7

CB 8 + RACK 8

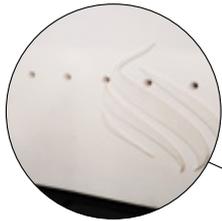

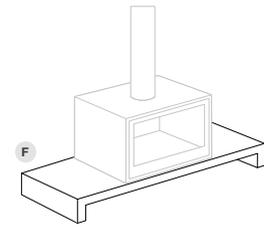

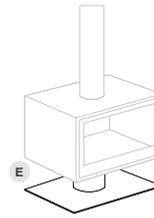

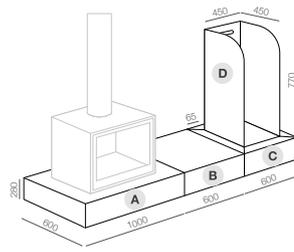

CB 10 + RACK 10

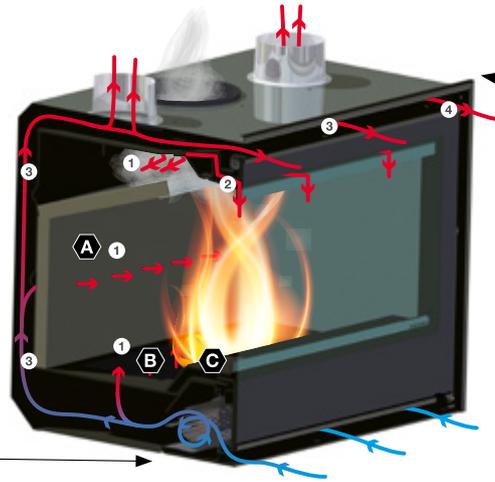

OTHER CB MODULES

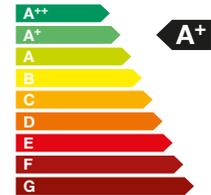

- A** BASE 1 **D** WOODBOX
- B** BASE 2 **E** FEET
- C** BASE 3 **F** BENCH

Option: Neotherm ceramic inside

A - Vermiculite / Neotherm inside / B - Cast iron grate / C - Big ash draw

80% Efficiency!
Very low emissions!

1 - CLEAN BURNING SYSTEM

All our stoves feature the Clean Burning System. This system injects preheated air to the combustion at the middle (terciary air) and upper part of the stove (secondary air - adjustable), in order to burn the hydrocarbons existent on smoke, reducing emissions dramatically and extending heat output.

2 - AIR CLEANING SYSTEM

This feature generates air flow on the inner side of the ceramic glass, keeping it clean longer.

3 - FULL POWER CONVECTION

Most of the heat produced by our stoves is transmitted through convection, since they have a special sealing chamber for the hot circulating air. This system accompanied by two powerful yet silent, tangential fans, increase quickly hot air diffusion into the room.

4 - AIR FLOW CONTROL

Stoves equipped with this feature allow you to direct the hot air outflow to other rooms, if the top outlets are used.

Top quality
High efficiency
Low consumption
High precision in flame control
